PROJECTS

Farmora – Direct Farm-to-Consumer E-Commerce Platform React.js, Node.js, Express, MongoDB

- Engineered a full-stack e-commerce solution bridging farmers and consumers directly, complete with secure authentication.
- Designed and implemented RESTful APIs for product catalogs, cart management, and order processing.
- Integrated secure JWT-based authentication and role-based access control for different user types.

cineDB – Movie Discovery & Watchlist Platform React.js, Node.js, Express, MongoDB

- Developed a responsive movie discovery application featuring dynamic search filters and personalized watchlists.
- Stored and managed complex user preferences and movie metadata using MongoDB and Mongoose.

Task Manager Application MERN Stack, Tailwind CSS

- Built a full-stack CRUD application allowing users to create, read, update, and delete tasks in real-time.
- Implemented custom status dashboards with intuitive UI layouts for effective personal task tracking.

HACKATHONS & COMPETITIONS

HackNovation 2.0 | GIET University February 2026

Team Alpha | Full Stack Developer

- Built "Mentor AI", an AI-powered study assistant using the MERN stack.
- Collaborated with teammates to develop a working prototype during a 48-hour hackathon.
- Implemented responsive frontend components and backend APIs.

INTERNSHIP EXPERIENCE

PCS Global (Perennation Computer Solutions) | Kolkata, WB Jun 2026

Web Development Intern

- Completed intensive industrial training focused on full-stack web development and scalable architectures.
- Contributed to practical implementations for e-commerce workflows and secure database integrations.
